

AT TUFTS UNIVERSITY

GHANA GOLD Study Tour

AngloAshanti Goldfields in Obuasi

Prof. Kutsoati (left) talks with the Estates Manager and public relations staff about some of the Corporate Social Responsibility (CSR) projects.

A gold-bearing rock will yield only a few flakes of pure gold.

This statue to the industrial mine worker marks the entrance to the AngloAshanti Goldfields estates.

Allah-Mensah, Bardot & Robinson suited up to tour a mine shaft 1 mile below the surface.

Surface mining strips all the vegetation and top soil from the land. Some of AngloAshanti Goldfields' CSR projects do reforestation.

Bardot, Robinson, Kutsoati and Allah-Mensah pose with AngloAshanti Goldfields mining engineer Emmanuel Kgogli (2nd from right).

Lodging at the Coconut Grove. University of Ghana Geology students will join the Tufts group for 2 days at this mining site.

AngloAshanti Goldfields' headquarters building in Accra is called "Gold House."
