

Information for BIO13L fall 2009

Textbook: **Biological Science + Mastering Bio Access Kit, 3E**
Author: Scott Freeman
Publisher: Pearson/Benjamin-Cummings Pub Co.

Because we understand that the rising cost of textbooks is a problem for many of our students, a custom package rate has been negotiated for BIO13L materials. This package will be available at the Tufts' bookstore and includes:

- 1) 3-hole punched, full-length version of Freeman 3e (unbound) with a 3-ring binder
- 2) Access to MasteringBiology (online resource REQUIRED for BIO13L)
- 3) "Short Guide to Writing about Biology" (resource book for completing laboratory assignments)

This custom package is available ONLY at the Tufts bookstore and should be bought there if you want to take advantage of the reduced cost. Of course, students are free to purchase this textbook plus the REQUIRED access code to MasteringBiology from other sources -

WARNING - BECAUSE THERE WILL BE GRADED ASSIGNMENTS THAT USE THE ONLINE SYSTEM "MASTERING BIOLOGY" - please make sure that when you purchase your textbook, the purchase price includes access to Mastering Biology (for example, used books will NOT have this feature and you will have to buy your own access code separately - which from what we have been told - will be fairly expensive).

See you in the fall and enjoy the rest of your summer!

- the BIO13L teaching team
