Reviews
1 Natural selection on quantitative immune defence traits: a comparison between theory and data
O. Seppälä

Research Papers
10 Evolution of spatially structured host-parasite interactions
S. Lion and S. Gandon

29 Evolutionary dynamics of interlinked public goods traits: an experimental study of siderophore production in Pseudomonas aeruginosa
A. Ross-Gillespie, Z. Dumas and R. Kümmerli

40 Explaining the sawtooth: latitudinal periodicity in a circadian gene correlates with shifts in generation number
R. C. Levy, G. M. Kozak, C. B. Wadsworth, B. S. Coates and E. B. Dopman

54 Female house mice avoid fertilization by haplotype incompatible males in a mate choice experiment
A. Manser, B. König and A. K. Lindholm

65 Within-plant variation in reproductive investment: consequences for selection on flowering time
E. J. Austen, J. R. K. Forrest and A. E. Weis

80 Ecomorphological variation in male and female wall lizards and the macroevolution of sexual dimorphism in relation to habitat use
A. Kaliontzopoulou, M. A. Carretero and D. C. Adams

95 Overdominance interacts with linkage to determine the rate of adaptation to a new optimum
J. Draghi and M. C. Whitlock

105 Recombination, chromosome number and eusociality in the Hymenoptera
L. Ross, H. Blackmon, P. Lorite, V. E. Gokhman and N. B. Hardy

117 Floral isolation is the major reproductive barrier between a pair of rewarding orchid sister species
M. Sun, P. M. Schlüter, K. Gross and F. P. Schiestl

130 Of mice and the ‘Age of Discovery’: the complex history of colonization of the Azorean archipelago by the house mouse (Mus musculus) as revealed by mitochondrial DNA variation
S. I. Gabriel, M. L. Mathias and J. B. Searle

146 Genetic basis and fitness correlates of dynamic carotenoid-based ornamental coloration in male and female common kestrels (Falco tinnunculus)
P. Vergara, J. A. Fargallo and J. Martínez-Padilla

155 Connecting thermal performance curve variation to the genotype: a multivariate QTL approach
J. A. Zuberbühler, H. R. Polito and P. F. Charnov

169 Why get big in the cold? Size–fecondity relationships explain the temperature size rule in a pulmonate snail (Physa)
J. Arendt

179 Genetic diversity, virulence and fitness evolution in an obligate fungal parasite of bees
J. E. E. Smits, E. V. Polya, A. J. Mean and W. O. H. Hughes

189 Contrasting reproductive strategies of triploid hybrid males in vertebrate mating systems
N. B. M. Pruvost, P. Mikulíc´ek, L. Choleva and H.-U. Reyer

205 Biomechanical behaviour, habitat use and species site differences shape evolutionary outcomes of Robertsonian in a coral reef fish
A. Gainsford, L. van Herwerden and G. P. Jones

223 Comparing measures of breeding inequality and opportunity for selection with sexual selection on a quantitative character in bighorn rams
A. M. Martin, M. Feinsinger, D. M. Coleman and F. Pelletier

239 Within-season increase in paternal investment in a long-lived species: investment shifts to maximize successful reproduction?
N. A. Schneider and H. Gompper

241 On the origin of Robertsonian fusions in nature: evidence of Robertsonian chromosome rearrangements as revealed by microsatellite DNA variation

250 Carotenoid-based bill coloration functions as a social, not sexual, signal in songbirds (Aves: Passeriformes)
C. J. Dey, M. Valcu, B. Kempenaers and J. Dale

153 Mate-sampling costs and sexy sons
H. Kokko, I. Booksmythe and M. D. Jennions

Cover photo: Many individuals of the social spider Stegodyphus sarasinorum attacking a moth caught in their catching web, in Kuppam, Andhra Pradesh, India. See Settepani et al., pp. 2850–2855. Photo: Virginia Settepani.
