*Course includes Research Paper

#Course satisfies the quantitative elective requirement for Quant Econ majors

&Course is designated as a seminar course

As a reminder, to be designated as a research paper course, a class must satisfy the following criteria:
1. Must count for at least 25% of the course grade;
2. Must have at least one core course as a prerequisite;
3. Should involve original thought;
4. Should be a substantive piece of work involving the following elements:
   1. A well-fined hypothesis or question that the paper is capable of answering;
   2. Include instructor feedback at various stages of the writing process. (For example, students might be required to undertake the following sequential assignments: short paper topic description, outline, bibliography, first draft, final draft);
   3. Involve multiple drafts;
   4. Marshall the appropriate evidence to engage in a critical analysis of the economic theories or conjectures relevant to the underlying hypothesis or question.

As a reminder, to be designated as a seminar course, a class must satisfy the following criteria:

Upper level seminars are courses that focus on a specialized topic in the field of economics. Because seminars focus on a specialized topic, all seminars have at least one of the core courses (Economics 11, Economics 16, Economics 12/18, Economics 13, Economics 15/107) as a prerequisite. In addition, seminars are classes that place an emphasis on class interactions, the writing of papers, and the reading of journal articles. Seminar courses provide alternative ways to have "hands-on" research experience that satisfies the seminar requirement. This experience could be offered by a required research paper. However, courses that ask students to complete a series of short policy briefs, a critical literature review, or a group project that requires substantive research and writing all count as seminars.
