This report will cover two academic years, 2001-2002 and 2002-2003, due to the fact that the chair of the committee failed to file a report in the spring of 2002.

During the academic year 2001-2002, the committee received four applications for admission. One of the applications has never been put into the form required by the guidelines for admission to the Interdisciplinary Doctorate Program and is still awaiting consideration. The remaining three applications were accepted by the committee, with the applicants entering the program in December 2001 and May and August 2002. No students completed the requirements for the Interdisciplinary Doctorate in 2001-2002.

In 2002-2003 the committee received three new applications. One, as yet incomplete, is pending consideration. Of the remaining two, one was denied admission and one accepted. The new student entered the program in March 2003. Meanwhile, two students have completed the requirements for the degree, one receiving the PhD in November 2002, the other to be awarded the degree in May 2003 (see Appendix B).

Just this month, on April 8, new PhD Diane Johnson worked with the support of Dean Kanarek’s office to organize a meeting of current Interdisciplinary Doctorate students and recent graduates to discuss the program and share experiences and ideas. We hope to call similar meetings regularly in the future, ideally twice a year. There are at present seven students actively working towards the Interdisciplinary Doctorate degree (see Appendix A).

For the committee,
Steven P. Marrone, Chair
