Members of the committee reviewed a large number of student petitions in consultation with department chairs and members of the faculty. We also worked closely with the Curriculum Committee to evaluate new courses for fulfilling requirements in Distribution areas, Foreign Language and culture, and World Civilization. One area that has emerged as meriting further clarification is the Technology Option that some students use to fulfill either the Natural Science or Mathematics requirements. The committee gratefully acknowledges the service of Peter Reid and Emese Soos, who will be both be stepping down in May.
