

Dear Health Care Provider:

Your patient has been accepted to Tufts University.

Please see the reverse side of this letter to review Tufts University medical requirements for entering undergraduate students. The physical examination and Tb risk assessment should be performed within 12 months prior to registration at Tufts.

The required immunizations (see reverse side) are in compliance with Massachusetts law, and must be complete in order to attend Tufts University. Entering undergraduate students are required to receive the full Hepatitis B immunization series, and two doses of Measles, Mumps and Rubella vaccine (MMR) and an updated tetanus immunization. In addition, all undergraduate students must be vaccinated against meningococcal disease, or must sign a waiver declining vaccination.

If your patient is being treated for a specific medical condition, we are happy to cooperate with you and continue in his/her management. We would appreciate receiving a summary of his/her record including the diagnosis, recommendations for further evaluations, if any, and treatment plan as indicated. For your convenience, our fax number is (617)-627-3592.

Thank you.

Sincerely,

Margaret Higham, M.D.
Medical Director
Tufts University Health Service
