

Please Note: Starting with the S10 semester, the Registrar is phasing in a new process by which SIS will actually enforce course prerequisites. The Psychology Department is participating in this test project, meaning that for many of the courses described below, you will have to meet the listed prerequisites in order to enroll. While the Registrar is still working out details, our understanding is that SIS will still allow any students to sign up for any course, but every evening during the registration process it will flag and remove from courses anyone who doesn't meet the prereqs (and will email students to inform them that this has happened so that they can select a replacement course). Please plan accordingly and contact your advisor with questions or concerns.
