Research Assistant Position

Professor Amy Cuddy’s lab is seeking enthusiastic Research Assistants to support research efforts in many exciting domains of social psychology. At present, we are examining questions around power and confidence, body language, and social stressors.

The general tasks for RAs will include, but are not limited to running participants, preparing experiments, and entering data. RAs will have the opportunity to learn many advanced research skills including how to measure physiological variables such as skin conductance and heart rate, operate eye-tracking equipment, and more.

This is a for-credit position only.

QUALIFICATIONS
We only consider candidates who will be earning college credit for their work through an internship course. The ideal candidate will be familiar with social sciences research methodology and the field of social psychology. Applications from all majors will be accepted, but the following characteristics are required:
- Familiar with MS Word, Excel and Outlook;
- Ability to work independently with a minimal amount of supervision;
- Strong interpersonal and leadership skills;
- High motivation and strong sense of ethics;
- Able to work 10 hours a week;
- Able to stay at least until late December 2013 with priority given to those who can stay longer;
- Prior psychology research experience or familiarity with social psychology is a plus.

HOW TO APPLY
Interested candidates should email their resume and cover letter to nthornley@hbs.edu.
