RESEARCH ASSISTANT POSITION
NEUROPSYCHOLOGICAL STUDIES OF HUMAN MEMORY

The Boston University Memory Disorders Research Center at VA Boston Healthcare System is seeking a college graduate with background in cognitive psychology, cognitive neuroscience, or related field to serve as a full-time research assistant in our laboratory. Anticipated starting date is early- to mid-summer 2013. Responsibilities include: assisting in the design and development of experiments; recruiting and scheduling research participants, including elderly individuals and patients with memory disorders; administering and scoring neuropsychological tests and computer-based experiments; maintaining and verifying the accuracy of databases; conducting statistical analyses; and performing administrative tasks related to laboratory management and human research compliance. Qualifications include: familiarity with cognitive psychology; knowledge of experimental design and statistics; basic computer skills; excellent oral and written communication skills; and a desire and ability to work effectively with patients. The position offers unique opportunities to become actively involved in cognitive neuroscience research and to be part of a lively and productive research group. Applicants should forward a letter of interest, a resume, two letters of recommendation and a transcript to:
